Income inequality in the United States is the extent to which income is distributed in an uneven manner among the American population. It has fluctuated considerably since measurements began around 1915, moving in an arc between peaks in the 1920s and 2000s, with a 30-year period of relatively lower inequality between 1950 and 1980.

But as in the Reconstruction era following the Civil War, the economic aid and investment necessary for African American communities to develop wealth was denied, leaving racial inequality to endure. Today, as we look back on the legacy of the first African American president, one would hope that much of the racial inequality between African Americans and white Americans had in fact been overcome.
