Cisco TMS and AD Lookup User Issue - Cisco Community
TMS redundancy use to be an active/active model, but was changed to active/passive starting with TMS 14.4. Even if the redundancy model was active/active, without an NLB and using the hot standby method, you'd still be deploying TMS as active/passive because of the manual intervention to fallover to the non active node in the case of a failure.

Solved: TMS Cluster - Cisco Community
Users only interact with Cisco TMS through the website, but the complete Cisco TMS product is actually constructed from three different logical components: Cisco TMS Web-Server: The web server used by Cisco TMS is Microsoft's Internet Information Server (IIS).
