Lean construction (LC) is a method of production aimed at reducing costs, materials, time and effort. Essentially, the methodology is to minimize the bad and maximize the good. Using the principles of lean-construction, the desired outcome would be to maximize the value and output of a project while minimizing wasteful aspects and time delay.

The processes of polishing and waxing your car's paintwork can make a huge difference to its overall appearance. You should only polish as and when required, usually during a full detail once or twice a year. We advise using a buffer for quality results, as this distributes pressure more evenly than a manual pad.
