This is a one-volume condensation of the Metals Handbook. The full handbook comprises over 20 phonebook-sized volumes, so a single-volume is a welcome addition to the series. Being a single volume it cannot be as comprehensive as the full multi-volume set, but it does include all of the basic and most important information.

The refractory metals

Online Library Metals Handbook Desk Edition

include niobium, tantalum, molybdenum, tungsten, and rhenium. They are readily degraded by oxidizing environments at moderately low temperatures. Protective coating systems have been developed, mostly for niobium alloys, to permit their use in high-temperature oxidizing aerospace applications.
