Pediatric Psychopharmacology Update Institute

Pediatric Acute-onset Neuropsychiatric Syndrome (PANS) is a clinical diagnosis given to children who have a dramatic – sometimes overnight – onset of neuropsychiatric symptoms including obsessions/compulsions or food restriction. They are often diagnosed with obsessive-compulsive disorder (OCD) or an eating disorder, but the sudden onset of symptoms separates PANS from these other disorders.

PANS | PANS: Pediatric Acute-onset Neuropsychiatric ...

hyperactivity in 1937 to the multisite clinical trials of the 21st century, pediatric psychopharmacology has evolved from an area of research to a standard of clinical care (Vitiello & Davico, 2018). Nevertheless, the role of pharmacotherapy in pediatric mental health remains the object of debate and controversy. With the

Journal of Child and Adolescent Psychopharmacology | Mary ...

When the first edition of Pediatric Psychopharmacology published in 2002, it filled a void in child and adolescent psychiatry and quickly establishing itself as the definitive text-reference in pediatric psychopharmacology. While numerous short, clinically focused paperbacks have been published since then, no competitors with the scholarly breadth, depth, and luster of this volume have emerged.
