Sap Mm Functional Specification Document

The SAP functional specification, affectionately referred to as functional spec, is critical to the development of RICEF objects. RICEF stands for Reports, Interfaces, Conversions, Enhancements, Forms — in other words, anything that requires programming in SAP. This post will delve into the purpose and content of a functional specification.

SAP Functional Specification - ERProof

A functional specification (also, functional spec, specs, functional specifications document (FSD), functional requirements specification) in systems engineering and software development is a document that specifies the functions that a system or component must perform (often part of a requirements specification) (ISO/IEC/IEEE 24765-2010).. The documentation typically describes what is needed ...

Functional specification - Wikipedia

In SAP, a functional specifications document is a description of the product from the stakeholder's point of view, with precise expectations for how the feature relates to SAP. You create functional specifications after you combine the FSD and software requirements document into one.
