The Columbia River Treaty A

Signed in 1961, the Columbia River Treaty calls for two "entities" to be designated to implement arrangements under the Treaty — a U.S. Entity and a Canadian Entity. The U.S. Entity, designated by the President, consists of the Administrator of the Bonneville Power Administration (chair) and the Northwestern Division Engineer (member) of the U.S. Army Corps of Engineers.

Columbia River Treaty - United States Department of State

The Columbia River Treaty is a 1961 agreement between Canada and the United States on the development and operation of dams in the upper Columbia River basin for power and flood control benefits in both countries. Four dams were constructed under this treaty: three in British Columbia, Canada and one in Montana in the United States. The treaty provided for the sharing with Canada of half of the downstream US power and flood benefits, and allows the operation of Treaty storage for other benefits.

Columbia River Treaty - Wikipedia

The provincial Columbia River Treaty Team is also focused on addressing Treaty-related community interests, finalizing the summary report for last fall's Columbia Basin community meetings, and exploring new ways of connecting with Basin residents. Our thanks to all of you who are navigating this challenging time with patience and understanding.

Columbia River Treaty | Government of British Columbia

In 1964, Canada and the United States (U.S.) ratified the Columbia River Treaty (Treaty), a transboundary water management agreement. The impetus for the Treaty was the disastrous flood of 1948 which devastated the City of Vanport in Oregon and cost many lives, along with growing power demand in the Pacific Northwest.
